

The Art Therapy Summary Paper And Annotated Bibliography

Think of your Summary Paper as your opportunity to share the journey of your internship. This can be a useful way to integrate your experiences. This paper needs to be at least 20 pages long.

Please discuss the goals and objectives of your internship and how you met them. If you were at more than one site, be sure and write about each site. (It's understandable that you may have more to write about one site.)

Include any issues of importance that surfaced and how you dealt with them. What did you enjoy? What was hard? What was surprising? What have you learned about yourself as an art therapist? How do you envision your further growth and development?

If you have examples of client art that you have permission to share, please include pictures.

The Annotated Bibliography is a separate document that shares 20 resources (at least 10 of which are books) that you found useful during your internship. Each resource listed includes a paragraph summarizing the resource and why you found it helpful.
